ENVIRONMENTAL POLICY

MEAZON SA is active in the design, development and production of hardware, software and firmware embedded systems.

The goal of the company's Environmental Policy is to prevent the burden on the environment, which may arise from its activities, as well as the continuous improvement of its environmental performance.

The Environmental Policy of **MEAZON SA** consists of the following points:

- The commitment of the Management to provide all the necessary resources for the implementation and improvement of the Quality and Environment Management System (Q&EMS).
- The commitment to protect the environment, to continuously improve and prevent any kind of pollution.
- The commitment to comply with the relevant environmental legislation, regulations but also to all other requirements that have been accepted, as well as their periodic evaluation.
- Setting environmental goals, systematically monitoring their implementation, and reviewing them.
- Informing the staff about its responsibilities according to the recorded Quality & Environment Management System (Q&EMS).

The Environmental Policy of **MEAZON SA** is applied with the following methods:

- Implementation of Q&EMS and the continuous improvement of it, through system reviews (i.e. achieving goals, results of internal inspections).
- Ensuring resource availability to achieve goals.
- Continuous employee training.

The Management of **MEAZON SA** is committed to the following tasks:

- Environmental Policy communication to the company's staff and executives.
- The staff and executives of the company are aware of the documentation and are held accountable for the implementation of the Q&EMS.
- Establishment and monitoring of specific measurable environmental objectives (KPI's).
- Updating frequently the Q&EMS and current environmental policy.
- Making available all the necessary resources for the implementation of the Q&EMS and the continuous improvement of its effectiveness.

The CEO
